

# TUBOLY MACHINE

### 3. Special machines

MRI winding machines

Bushing winding machines

Corrugated fin panel production lines

MRI coil winding machine type SCWM 1500

**MRI winding machines:** The machines are used to wind the MRI coils with sensitive supra conductor at highest accuracy.

**Main machine features:**

- Highest winding accuracy
- Constant wire tension
- Simple loading without crane
- Full data capture for quality management
- Operator guidance on the touch screen

Corrugated fin panel production line type TFF5 1600-400

**Corrugated fin panel production lines:**

The fin folding and welding machine is a full automated, PC-operated production line to fold, form and weld corrugated fin panels for transformer housings.

**Main machine features:**

- Automated production line due to an integrated conveyor system
- Ergonomic set-up system for clamping plates
- Flexible software for individual production batches
- Accurate, precise and efficient folding, shearing and seam welding
- Efficiency package for hydraulic unit
- Options for spot welding of reinforcement strip and embossments, rod magazine etc.
